[The enclosed coin is a quarter of a  
florin (Guilder) of Salzburg. These  
were coined by the Bishops...]

Letter only.

The enclosed coin is  
a quarter of a florin (Gulden)  
of Salzburg - these were  
coined by the Bishops -

The enclosed specimen is  
one coined by Bishop  
Guidobaldo of Salzburg in  
the year 1654, and is a  
very rare coin, owing to the  
brief reign of that Bishop.

Also  $\frac{1}{2}$  florins and one  
florin coins were then emitted,  
and gold coins of the value

of one ducat, all of a  
square shape—

They are all very precious  
on account of the scarcity  
of them.

F. Herman

Trieste, 18<sup>th</sup> June 1878.
